Annual Index-Volume 50

LIST OF ISSUES IN VOLUME 50, January 1972 to December 1972

No. 1	January	Pages 1— 32
" 2	February	33— 68
" 3	March	69—100
" 4	April	101—132
" 5	May	133—164
" 6	June/July	165—204
" 7	August	205—236
" 8	September	237—268
" 9	October	269—300
" 10	November	301—332
" 11	December	333—364

A

ABSORPTION OF LIGHT IN GLASS FIBERS 302-310
Adjustment Wrench Developed 130
ADOIT (Automatically Directed Outgoing Intertoll Trunk test circuit) 75-77
AIRLIGHT PHONE BOOTH 173
AIR TRAFFIC CONTROL, TELEPHONE SWITCHING 66
AIS (Automatic Intercept System) 276-278
Albert, W. G., *Ensuring Carrier System Reliability* 2-7
ALIT (Automatic Line Insulation Test) EQUIPMENT 43, 57, 279-281
Amplifier Correction System Demonstrated at Bell Labs 95
Amplifier for Headsets 130
ANALIT (Analysis of Automatic Line Insulation Tests) 43, 57, 279-281
ANALIT Turns Test Data into Test Information, Eugene J. Carola 279-281
Anderson, Milton M., *CAROT for Automatic Trunk Testing* 322-329
Andrews, F. T. Jr., *Customer Lines Go Electronic* 58-64
ARCHITECTURAL WALK-IN BOOTH 169
ATMS (Automatic Transmission Measuring System) 75-77, 322-324, 326-328
AUGER SPECTROSCOPY 186-188
Automatic Carrier Measurements 163
Auxiliary Programs for No. 1 ESS 130

B

BACKBOARDS FOR LARGE TELEPHONE FACILITIES 218-220
BANKING BY VOICE 254-259
Bardeen, John, *Three Men Who Changed Our World—25 Years Later* 336-337
Bartley, K. D., *Diversity in Public Telephone Enclosures* 166-179
BATTERIES FOR THE TELEPHONE PLANT 207-211
Bell Companies Converting to DIR/ECT 201
Bell Labs Develops Liquid-Core, Low-Loss Optical Fiber 157
Bell System and Pollution Control, The, N. Bruce Hannay 199
Berger, A. F. Jr., *Testing Undersea Repeaters* 290-294
Bergholm, J. O., *Serving Area Concept—A Plan for Now With a Look to the Future* 212-216
Biagetti, R. V., *The Lead-Acid Battery: A New Shape for an Old Workhorse* 206-211
BIGFET (Bipolar Insulated Gate Field-Effect Transistor) 194-198
BIGFET Makes IGFET More Versatile, Glen T. Cheney and George Marr 194-198
BIS MODELING AND PLANNING SYSTEM (MAPS) 189-193
BOOTHS, TELEPHONE 166-179
  airlight 173
  architectural walk-in 169
  curved-door 172
  diamond kiosk 170
  hands-free 168
  low profile 178
  park kiosk 178-179
  universal 173
  wooden 171
Bowker, M. W., *Testing Cable Pairs . . . Fast* 87-92
Brattain, Walter H., *Three Men Who Changed Our World—25 Years Later* 338-339
BREAKDOWN TEST SET 90
BRIDGE, DIRECT-READING 92
Brosnahan, Daniel F. Jr., *Developing Systems Engineering Programs for Operating Companies* 114-119
Bullington, K., *Unlocking the Secrets of Microwave Propagation* 8-13
Burgiel, Joseph C., *REG Circuits Extend Central Office Service Areas* 243-247
Burwell, Grant H., *A Portable Test Set for Detecting Errors on T-1 Lines* 14-17
But Can You Talk Through It?, R. E. DeVore and R. F. Sievert 75-79

C

CABLE PAIR, TESTING 87-92
CABLE PRESSURE MONITORING 56-57
CABLE RECLAMATION 160
CALL STORE MEMORY FOR NO. 1 ESS 120-123
CARBON MONOXIDE, RARE-EARTH COMPOUNDS CONVERT 298

Carola, Eugene J., *ANALIT Turns Test Data into Test Information* 279-281
CAROT (Centralized Automatic Reporting on Trunks) 322-329
CAROT for Automatic Trunk Testing, Milton M. Anderson, David V. Helsing, and Albert Mizrahi 322-329
CARRIER SYSTEMS 3-7
CCD's (CHARGE-COUPLED DEVICES)
for color video camera 262-263
for video camera 158
CCIS (Common Channel Interoffice Signaling) 273
CCITT No. 6 273-274
CCUAP (Computerized Cable Upkeep Administrative Program) 42
CENTRAL OFFICE, PROVIDING SWITCHING EQUIPMENT FOR 311-315
CHANNEL BANK, D-3 229-233
Cheney, Glen T., *BIGFET Makes IGFET More Versatile* 194-198
Chevalier, J. G., *New Memory Reduces No. 1 ESS Cost and Size* 120-123
Close Look at Surfaces, A, Kenneth A. Jackson 180-188
COEES (Central Office Equipment Estimation System) 311-315
COEES—A New Tool for the Telephone Company Engineer, G. E. Montgomery 311-315
COIN PHONES
for handicapped 110-113
test line for 57, 150-154
vandal-resistant enclosure for 176
vandal-resistant mount for 266
COIN STATION TESTING 57, 150-154
COLOR-CODED BACKBOARDS 218-220
COLOR TV CAMERA, FIRST SOLID-STATE 262-263
Communicating With Computers Over Data Concentration Systems, Larrabee M. Smith 144-149
Compact Helium-Cadmium Laser Designed 67
Computer Calculates Costs of Installing Bus Bars 267
Computer Given 'Voice' On Bell Assembly Line 98
Computers and the Exchange Plant, H. Z. Hardaway 36-43
COMPUTERS, COMMUNICATING WITH 144-149
CONCENTRATION SYSTEMS FOR DATA 144-149
Connective System for Customer Premises, Raymond B. Ramsey 217-221
Connective Systems: Evolving New Strategies, Nicholas Osifchin 44-51
Connelly, J. J., *A Portable Test Set for Detecting Errors on T-1 Lines* 14-17
CONSOLES FOR PBX/CTX USE 128
COPPER, RECLAIMING 284-287
CREDIT-CARD DIALER 248-253
CROSSLINKING 240-242
CRYSTAL BAND TEST SET 290-294
Crystal for Communications Systems Enters Production Stage, New 296-297
CURVED-DOOR PHONE BOOTH 172
Customer Lines Go Electronic, F. T. Andrews, Jr. 58-64

D

Dacey, George C., *The Exchange Plant* 34-35
DATA COMMUNICATIONS
concentration systems 144-149
transmission objectives 18-21
DELTA MODULATION FOR SLM 61-62, 82
DELUXE BOOTH 172-173
Deming, R. D., *If At First A Call Doesn't Succeed* 70-74
DETECTOR, MICROWAVE RADIATION 261
Developing Systems Engineering Programs for Operating Companies, Daniel F. Brosnahan Jr., and Donald J. Garay 114-119
Development of New Trunk Circuits 267
DeVore, R. E., *But Can You Talk Through It?* 75-79
DIAMOND KIOSK PHONE BOOTH 170
Digital Multiplexer for Expanded Rural Service, Irving M. McNair, Jr. 80-86
DIGITAL TRANSMISSION, D-3 CHANNEL BANK 229-233
DIRECTORY ASSISTANCE 316-321
DIRECT-READING BRIDGE 92
DISTORTION OF DATA 18-21
Diversity in Public Telephone Enclosures, K. D. Bartley 166-179
DLCS (Data Line Concentration System) 144-149
DLL (Dial Long Line) CIRCUIT 60, 243, 245, 247
D3 Channel Bank, The, W. B. Gaunt and J. B. Evans, Jr. 229-233

E

EFRAP (Exchange Feeder Route Analysis Program) 41, 119
800A PBX 138
801A: Midi-PBX, The, Michael S. Lane 134-139
ELECTRON DIFFRACTION
high energy 186-187
low energy 185-187
ELECTRON MICROSCOPE, SCANNING 180-188
ENCLOSURES (see BOOTHS)
ENGINEERING, EXCHANGE PLANT 36-43
Ensuring Carrier System Reliability, W. G. Albert 2-7
ENVIRONMENT 199, 282-289
EQUIPMENT ADDITIONS TO CENTRAL OFFICE 311-315
ERROR DETECTOR FOR T-1 CARRIER 14-17
E6 REPEATER 60, 245, 247
ESS
No. 1 120-123, 271, 273-275
No. 1A 265
No. 101 271, 274
No. 2 276-277
No. 2A 129
No. 4 264-265, 273, 276
ESS MODULAR MAIN DISTRIBUTION FRAME 49
E-2 TELEMETRY 57
Evans, J. B. Jr., *The D3 Channel Bank* 229-233
EXCHANGE PLANT, COMPUTER PROGRAMS 36-43
Exchange Plant, The, George C. Dacey 34-35
Experiment in Microfilm Directory Assistance, An, Grace L. Kubitsky and John J. Naughton, Jr. 316-321

F

FADING, MICROWAVE 10
FADS (Force Administration Data System) 318-320
FDI (Feeder Distribution Interface) 46
Feder, D. O., *The Lead-Acid Battery: A New Shape for an Old Workhorse* 206-211
FEEDFORWARD TECHNIQUE 95
Fennick, J. H., *Transmission Objectives for Voiceband Data* 18-21
FERRITE-CORE MEMORY FOR NO. 1 ESS 120-123
FIELD-EMISSION MICROSCOPE 185-186
FIELD-ION MICROSCOPE 180, 183, 186
Field Representative: Consultant, Engineer, Ambassador, The, R. Emil Friedley, Robert J. Gabel, Jack K. Middaugh, and W. Ren Peoples 222-228
FILTERS, LITHIUM TANTALATE AND QUARTZ 296-297
First Solid-State Color TV Camera 262-263
FORMANTS 256-259
French, William G., *Low-Loss Glass Fibers For Optical Transmission* 102-109
Friedley, R. Emil, *The Field Representative: Consultant, Engineer, Ambassador* 222-228

G

Gabel, Robert J., *The Field Representative: Consultant, Engineer, Ambassador* 222-228
GALLIUM PHOSPHIDE 331

Garay, Donald J., *Developing Systems Engineering Programs for Operating Companies* 114-119
GAS LASERS, MINIATURE 162
Gaunt, W. B., *The D3 Channel Bank* 229-233
GLASS FIBERS
liquid-core 157
loss measurement 302-310
optical transmission 102-109
GLASS WAVEGUIDES 162
Glossary of Solid-State Electronics, A 347-350
GO/NO-GO TEST SET 87
Grandle, J. Arthur, *A New Test Line For Coin Phones* 150-154
Growth of a Technology—A Look at the RECORD, *The* 351-358

H

Hall, Norris R., *Helping the Handicapped to Dial Easier* 110-113
HANDS-FREE BOOTH 168
Hannay, N. Bruce, *The Bell System and Pollution Control* 199
Hardaway, H. Z., *Computers and the Exchange Plant* 36-43
Hardwick, N. E., *Thermal Design of Integrated Circuits* 22-27
HEAT TRANSFER IN INTEGRATED CIRCUITS 22-27
HEED (High-Energy Electron Diffraction) 186-187
HELIUM-CADMIUM LASER 67
HELIUM-NEON MINIATURE LASER 162
Helping the Handicapped to Dial Easier, Norris R. Hall 110-113
Helsing, David V., *CAROT for Automatic Trunk Testing* 322-329
Henry, James L., *REG Circuits Extend Central Office Service Areas* 243-247
Higgins, William H. C., *Major Trends in Switching* 270-278
High-Capacity Mobile Communications System Proposed 96-97
High Frequency Phonons: A New Research Tool 126-127
HOLOGRAPHIC INTERFEROMETRY 27
Holt, V. E., *Thermal Design of Integrated Circuits* 22-27

I

If At First A Call Doesn't Succeed, R. D. Deming and T. J. Lawrence 70-74
IGFET's (Insulated Gate Field-Effect Transistors) for SLM 86, and see BIGFET
IMAGING DEVICE WITH CCD's 158, 262-263
Improved Performance for Concentrator-Identifier Circuits 163
INFRARED SPECTROSCOPY 186, 188
INSULATION, WIRING 238-242
INTEGRATED CIRCUITS, THERMAL DESIGN 22-27
INTERNATIONAL SWITCHING SYMPOSIUM 270
INTERTOLL TRUNKS 75-77
IRRADIATED INSULATION 240-242
ITAP (Intrastate Toll Analysis Program) 114

J

Jackson, Kenneth A., *A Close Look at Surfaces* 180-188

K

KIOSK
diamond 170
park 178-179
Koliss, P. P., *Serving Area Concept—A Plan for Now With a Look to the Future* 212-216
Kubitsky, Grace L., *An Experiment in Microfilm Directory Assistance* 316-321

L

Lane, Michael S., *The 801A: Midi-PBX* 134-139
LANTHANUM LEAD MANGANITE 298
LASER
helium-cadmium 67
machining 200
miniature gas 162
Lawrence, T. J., *If At First A Call Doesn't Succeed* 70-74
Lead-Acid Battery: A New Shape for an Old Workhorse, The, D. O. Feder and R. V. Biagetti 206-211
LED (Light-Emitting Diode) 331
LEED (Low-Energy Electron Diffraction) 186-187
L-5 CARRIER SYSTEM
LED's for 331
reliability 4-5
LFRAP (Long Feeder Route Analysis Program) 41
LINE STATUS VERIFIER 56
LIQUID-CORE GLASS FIBER 157
LITHIUM TANTALATE 296-297
Loan, L. Donald, *A New Insulation for Central Office Wiring* 238-242
LOOP PLANT, TESTING 52-57
LOSS MEASUREMENT, GLASS FIBERS 302-310
Low-Loss Glass Fibers For Optical Transmission, A. David Pearson and William G. French 102-109
LOW-PROFILE BOOTH 178
L-Type Multiplex Equipment 267
Lummis, Robert C., *Speaker Verification: A Step Toward the "Checkless" Society* 254-259

M

MACHINING WITH LASERS 200
MAINTENANCE
cable pairs 87-92
coin station 57, 150-154
exchange and loop plant 36-43, 52-57, 279-281
trunk 75-79, 322-329
undersea repeaters 290-294
Major Trends in Switching, William H. C. Higgins 270-278
MANUAL TEST FRAME FOR NO. 4-TYPE TOLL CROSSBAR 78-79
Marr, George, *BIGFET Makes IGFET More Versatile* 194-198
MATERIALS, SUBSTITUTION 285-288
McNair, Irving M. Jr., *Digital Multiplexer for Expanded Rural Service* 80-86
MDF (Main Distribution Frame) 46-49
Measuring Loss in Optical Fibers, Arthur R. Tynes 302-310
MECHANIZED LINE RECORDS SYSTEM 56
MEMORIES 270-271
MEMORY FOR NO. 1 ESS 120-123
MICROFILM
directory assistance 316-321
retrieval units 316-321
MICROSCOPY, FOR STUDY OF SURFACES 180-188
MICROWAVE
fading 10
propagation 8-13
radiation detector 261
MIDAS (Multiple Input Data Acquisition System) 11-13
Middaugh, Jack K., *The Field Representative: Consultant, Engineer, Ambassador* 222-228
Miller, Dan, *A Telephone for the "Checkless" Society* 248-253
MINIATURE GAS LASERS 162
Mizrahi, Albert, *CAROT for Automatic Trunk Testing* 322-329
MOBILE RADIO, HIGH-CAPACITY 96-97
Modern Telephone Repair Service 99
Modular ESS Offices Shorten Installation Interval 129

Montgomery, G. E., *COEES—A New Tool for the Telephone Company Engineer* 311-315
More "Special" Transverters for No. 1 Crossbar 130
Morgan Sparks Reflects on 25 Years of Transistors 342-346
Morton, Jack A., Bell Labs Vice President (1913-1971) 29

N

Naughton, John J. Jr., *An Experiment in Microfilm Directory Assistance* 316-321
New Centrex Features for No. 1 ESS 267
New Crystal for Communications Systems Enters Production Stage 296-297
New Data Set for Low-Speed Private-Line Use 99
New Design Series Published 125
New Detector Spots Microwaves 261
New Features for ESS 163
New Insulation for Central Office Wiring, A, L. Donald Loan and Warren A. Salmon 238-242
New Laser Process "Machines" Electronic Circuits 200
New Memory Reduces No. 1 ESS Cost and Size, J. G. Chevalier and Michael W. Rolund 120-123
New Networks for E6 Repeatered Circuits 201
New PBX Distribution Field 99
New Solid-State Video Camera 158
New Test Line for Coin Phones, A, J. Arthur Grandle 150-154
NOISE ON DDD NETWORK 19-21
No. 1 ESS 120-123, 271, 273-275
No. 1A ESS 265
No. 101 ESS 271, 274
No. 2 ESS 276-277
No. 2A ESS 129
No. 4 CROSSBAR 70-79
No. 4 ESS 264-265, 273, 276
No. 4 ESS Will Triple Toll Capacity 264-265

O

1A PROCESSOR 265, 275-276
130-Volt Converter Offers 3-Ampere Capacity 201
OPERATING COMPANIES, SYSTEMS ENGINEERING PROGRAMS FOR 114-119
OPTICAL FIBERS, see GLASS FIBERS
OPTICAL TRANSMISSION, GLASS FIBERS 102-109
Optional Features for T-2 128
Osifchin, Nicholas, *Connective Systems: Evolving New Strategies* 44-51

P

PARK KIOSK 178-179
PBX, 801A 134-139
PBX/CTX STANDARDIZED CONSOLES 128
Pearson, A. David, *Low-Loss Glass Fibers For Optical Transmission* 102-109
Peoples, W. Ren, *The Field Representative: Consultant, Engineer, Ambassador* 222-228
Peterson, J. L., *Telephone Headsets With a New Look* 140-143
Pfeiffer, Sigmund B., *A Portable Test Set for Detecting Errors on T-1 Lines* 14-17
PHONONS, HIGH-FREQUENCY 126-127
PHYSICAL DESIGN OF ELECTRONIC SYSTEMS (Book) 125
PIC WATERPROOFING 160
PLANNING, EXCHANGE PLANT 36-43
Planning for BIS Installation, John E. Yingling, Jr. 189-193
POLLUTION CONTROL IN BELL SYSTEM 199, 282-289
POLYETHYLENE INSULATED CONDUCTORS, see PIC
POLYMERS 238-242
Portable Test Set for Detecting Errors on T-1 Lines, A, Grant H. Burwell, J. J. Connelly, and Sigmund B. Pfeiffer 14-17
Power Failure Transfer for PBX Trunk Repeaters 99
Prince, Terry, *A Telephone for the "Checkless" Society* 248-253
PRIVATE BRANCH EXCHANGE, see PBX
PROBE, STATIONMAN 89
PROCESSOR, 1A 265, 275-276
PROGRAMMING 36-43, 114-119, 279-281, 311-315
PUBLIC TELEPHONE FOR THE HANDICAPPED 110-113
PULSE TRAIN, T-1 CARRIER 16
PVC (Polyvinyl Chloride) 238-242

Q

QUARTZ CRYSTALS 296-297

R

RADIATION DETECTOR, MICROWAVE 261
RADIO, MOBILE 96-97
Ramsey, Raymond B., *Connective System for Customer Premises* 217-221
RANGE EXTENDER WITH GAIN, see REG
Rare-Earth Compounds Convert Carbon Monoxide 298
READY-ACCESS TERMINAL (49A) 47
RECORDING TROUBLE CALLS IN NO. 4 TOLL CROSSBAR 73-74
RECYCLING 282-289
REG Circuits Extend Central Office Service Areas, Joseph C. Burgiel and James L. Henry 243-247
REG (Range Extender with Gain) 60-64, 243-247
RELIABILITY, CARRIER SYSTEM 2-7
Remote Testing for No. 1 ESS 201
REPAIR SERVICE BUREAU 52-57, 279-281
REPEATERS, TESTING UNDERSEA 290-294
REPRESENTATIVES, FIELD 222-228
Resources, the Environment, and the Bell System, Tom D. Schlabach 282-289
Rolund, Michael W., *New Memory Reduces No. 1ESS Cost and Size* 120-123
RURAL SERVICE, DIGITAL MULTIPLEXER FOR 80-86

S

SAC, see SERVING AREA CONCEPT
Salmon, Warren A., *A New Insulation for Central Office Wiring* 238-242
SB CABLE SYSTEM 290, 293-294
SCANNING X-RAY 186-187
SCATTERING OF LIGHT IN GLASS FIBERS 302-310
SCHEDULING BIS INSTALLATIONS 190-192
Schenker, Leo, *Testing in the Loop Plant* 52-57
Schlabach, Tom D., *Resources, the Environment, and the Bell System* 282-289
SD CABLE SYSTEM 290-294
SENDER RETRIAL 71-73
SERVING AREA CONCEPT
concept 48, 212-216
interface 214
interface connector 49-50
Serving Area Concept—A Plan for Now With a Look to the Future, J. O. Bergholm and P. P. Koliss 212-216
701B PBX Is Modified 267
701B PBX Updated 163
SHELF, WALL MOUNTED 175
Shockley, William, *Three Men Who Changed Our World—25 Years Later* 340-341
Sick PIC Salve: New Medicine for Water-Logged Cable 160
Sievert, R. F., *But Can You Talk Through It?* 75-79
SILICA 104-106
SIMULATOR, TRANSMISSION-LINE 19
SLM (Subscriber Loop Multiplexer) 60-64, 80-86

SMALL-TALK SHELF 176
Smith, G. A., *Testing Undersea Repeaters* 290-294
Smith, Larrabee M., *Communicating With Computers Over Data Concentration Systems* 144-149
SODA-LIME GLASS 104-106
SOLID-STATE
color video camera 262-263
video camera 158
SOLID-STATE ELECTRONICS, A GLOSSARY OF 347-350
SOLID-STATE ELECTRONICS, BELL LABS INNOVATIONS
beam-lead, sealed-junction device 356
Bell solar battery 353
charge-coupled device 358
collector diffusion isolation 357
diffused-base transistor 355
diffusion 354
epitaxy 356
hybrid integrated circuits 357
IMPATT 357
insulated-gate field-effect transistor 356
ion implantation 358
junction field-effect transistor 354
junction transistor 352
oxide masking 355
PICTUREPHONE® camera tube target 357
point-contact transistor 351, 352
primary pattern generator 358
single crystal silicon 353
thermocompression bonding 354
zone refining 353
Solid-State Power Systems 99
SPACE-DIVISION SWITCHING 272-273
Sparks, Morgan, *Morgan Sparks Reflects on 25 Years of Transistors* 342-346
Speaker Verification: A Step Toward the "Checkless" Society, Robert C. Lummis 254-259
SPEECH, COMPUTER-GENERATED 98
STANDARD SHELF 166-179
Standardized PBX/CTX Consoles 128
STATIONMAN PROBE 89
STORED PROGRAM SWITCHING 270-278
SUBSCRIBER LOOP MULTIPLEXER (SLM) 60-64, 80-86
SURFACES, MATERIAL 180-188
SWITCHING, ELECTRONIC TOLL 264-265, 273, 276
SWITCHING FOR AIR TRAFFIC CONTROL 66
SWITCHING, MAJOR TRENDS IN 270-278
SYSTEMS ENGINEERING PROGRAMS FOR OPERATING COMPANIES 114-119

T

TANDEM CROSS-SECTION PROGRAM 40
TAT III AND TAT IV CABLES 294
TCR (Test Control and Recording Circuit) 76
TD-2, TD-3 Test Set Replaced 130
TELEPHONE BOOTHS 166-179
TELEPHONE FACILITIES FOR LARGE BUILDINGS 217-221
Telephone for the "Checkless" Society, A, Terry Prince and Dan Miller 248-253
Telephone Headsets With a New Look, J. L. Peterson 140-143
Terminal Equipment for L-4, L-5 130
TEST LINE FOR COIN PHONES 57, 150-154
TEST SETS
breakdown 90
go/no-go 87
T-1 carrier 14-17
TESTING
cable pairs 87-92
coin station 57, 150-154
loop plant 52-57, 279-281
trunk 75-77, 322-329
undersea repeaters 290-294
Testing Cable Pairs . . . Fast, M. W. Bowker 87-92
Testing in the Loop Plant, Leo Schenker 52-57
Testing Undersea Repeaters, G. A. Smith and A. F. Berger, Jr. 290-294
Thermal Design of Integrated Circuits, V. E. Holt and N. E. Hardwick 22-27
Three Men Who Changed Our World—25 Years Later, John Bardeen, Walter H. Brattain, William Shockley 335-341
301A SWITCHING SYSTEM 66
Thru-Dialing for 800A and 801A PBX's 201
TIME-DIVISION SWITCHING 272-273
Tiny Glass Waveguides Make Possible Miniature Gas Lasers 162
TOLL-COMPLETING TRUNKS 78-79
TOLL SWITCHING 264-265, 273, 276
T-1 CARRIER SYSTEM
portable test set 14-17
reliability 6
with D-3 channel bank 229-233
Tools for Removing Wires 99
TOUCH-TONE® CREDIT-CARD DIALER 248-253
Tower to Pilot: Telephone Switching For Air Traffic Control 66
TRANSISTOR, 25TH ANNIVERSARY 334-360
TRANSMISSION-LINE SIMULATOR 18-21
Transmission Objectives for Voiceband Data, J. H. Fennick 18-21
TRANSMISSION, OPTICAL 102-109
TRANSMISSION TESTING IN 4A CROSSBAR 75-77
TRIMLINE® TELEPHONE 331
TRUNK TESTING 75-77, 322-329
TSPS (Traffic Service Position System) 276-277, 331
T-2, OPTIONAL FEATURES FOR 128
TV CAMERA
solid-state 158
solid-state color 262-263
2A RANGE EXTENDER 60, 245, 247
Tynes, Arthur R., *Measuring Loss in Optical Fibers* 302-310

U

UNICCAP (Universal Cable Circuit Analysis Program) 41, 114
UNIVERSAL PHONE BOOTH 173
Unlocking the Secrets of Microwave Propagation, K. Bullington 8-13

V

VANDAL-RESISTANT COIN TELEPHONES
enclosure for 176
mount for 266
